World Health Organization – Sierra Leone

December, 2015

Draft-0

In Port Loko district a total of n=113 health facilities have reported as functional PHUs. Of which n=15 of them are classified as CHC (Community Health Care), n=21 of them are CHP (Community Health Post), n=70 of them are MCHP (Maternal and Child Health Post), n=2 of them are Government Hospital, n=2 of them are Missionary Hospital, n=3 of them are NGO Clinics and there is one (n=1) private hospital available at the district in the Kaffu-Bullom chiefdom.

Table 1. Shows Port Loko district health facilities distribution by chiefdoms.

Chiefdoms	CHC	CHP	MCHP	Govt. Hospital	Missionary Hospital	NGO Clinic	Private Hospital	Total
BKM	1	3	7	0	0	0	0	11
BUYA ROMENDE	1	0	8	0	0	0	0	9
DEBIA	1	1	3	0	0	0	0	5
KAFFU BULLOM	3	2	4	1	2	2	1	14
KOYA	1	2	14	0	0	0	0	17
LOKOMASAMA	3	6	8	0	0	0	0	17

MARAMPA	1	0	5	0	0	0	0	6
MASIMERA	1	2	6	0	0	0	0	9
SANDA MAGBOLONTHOR	1	1	3	0	0	0	0	5
TMS	1	1	3	0	0	0	0	5
Total	15	21	70	2	2	3	1	113

In Port Loko district, a total of n=106 government PHUs health facilities have been observed to assess the capacity and availability of resources and services in the ground. Of which n=8 PHUs have reported with no data including CHC (1), CHP (3) and MCHP (4) from Koya (4), Lokomasama (1) and from Masimera (3).

Port Loko PHUs Distributions by Chiefdom as of December, 2015

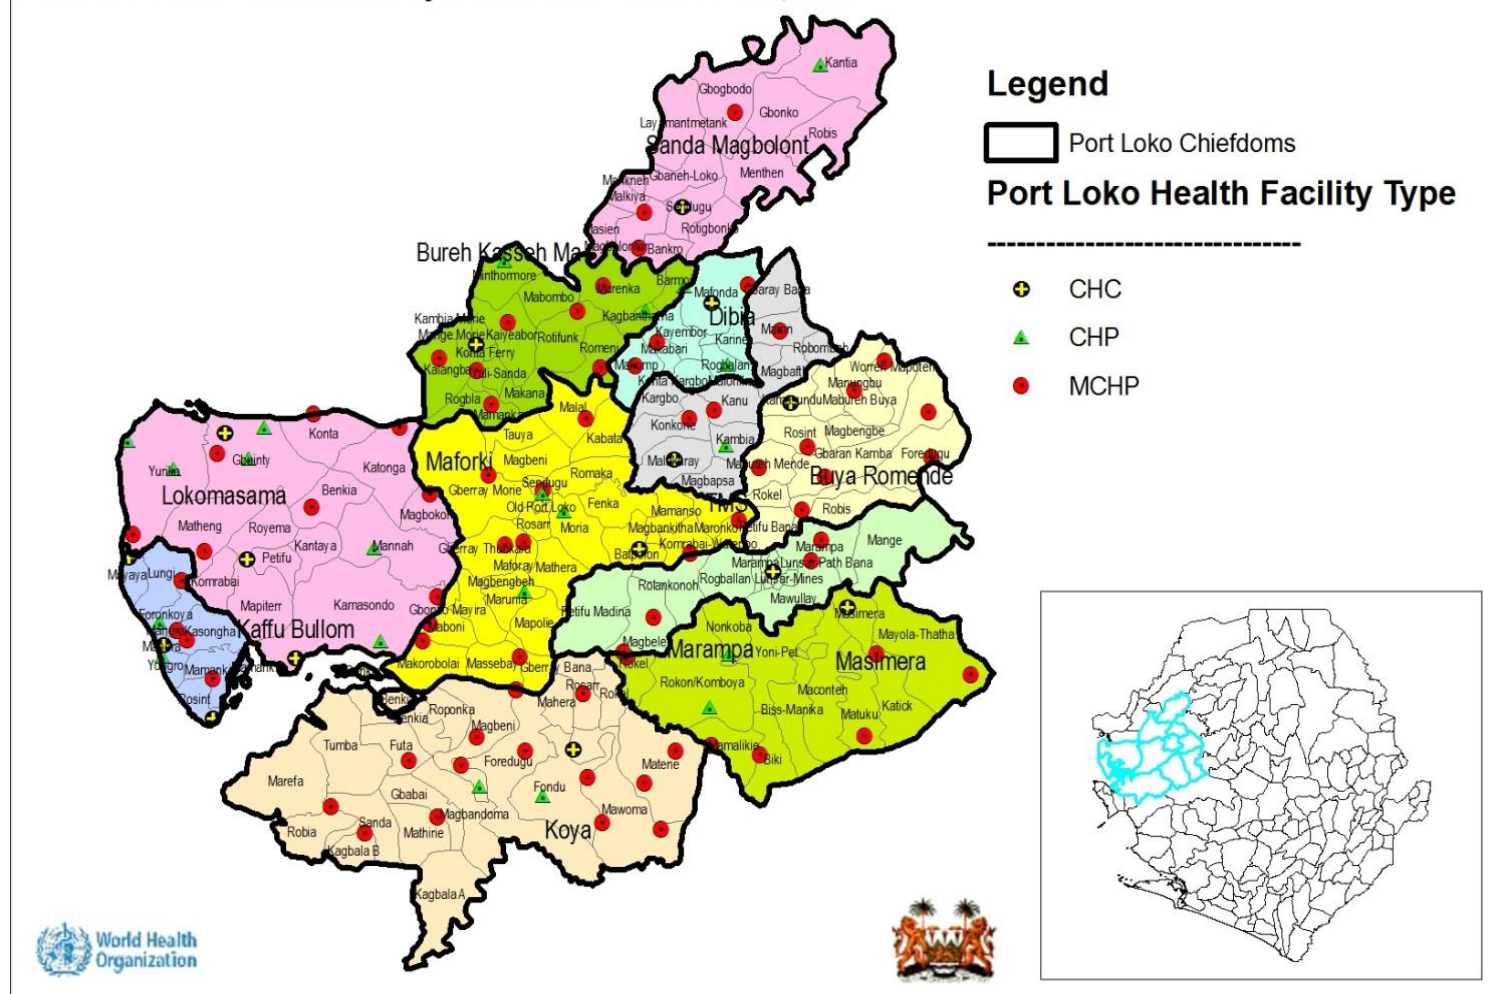

Fig.1 Shows Geo-Spatial distribution of the PHUs in Port Loko districts. The map only shows n=106 government health facilities.

Solar Refrigerator Availability Status

Out of the total n=106 rapid assessment PHUs from Port Loko district, n=45 (42%) of the PHUs have reported that, the solar refrigerator have functioning, n=20(19%) not functioning, 33(31%) have reported that the solar refrigerator is not available at all and the 8(8%) PHUs facilities have reported with no data.

Table 2. Shows the Solar refrigerator availability status, Port Loko district, Sierra Leone

Solar Refrigerator Status	Number	Percent
Functional	45	42.5
Not-Functioning	20	18.9
Not Available	33	31.1
No Data	8	7.5
Total	106	100

Distribution of Solar Refrigerator Functional Status by PHUs, Port Loko, Sierra Leone as of December, 2015

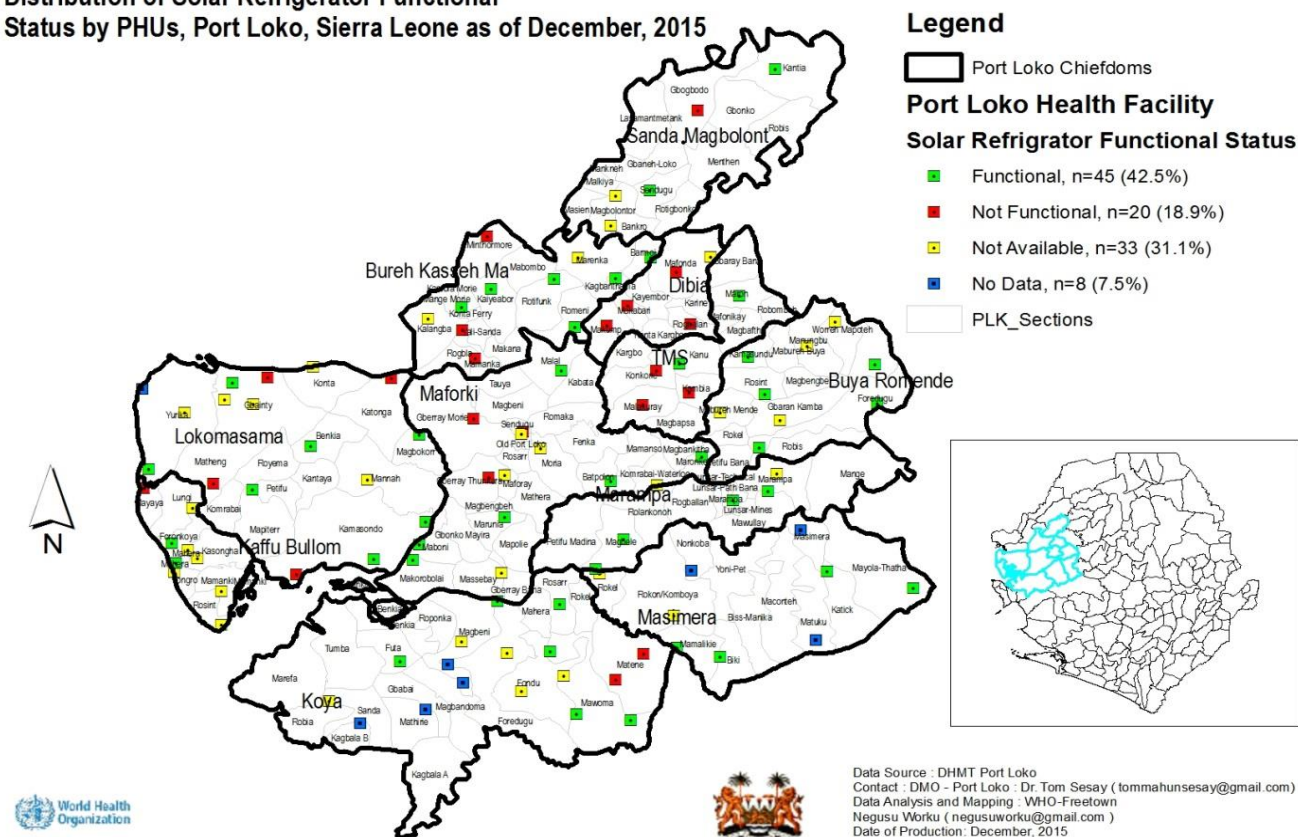

Fig 2. Geo-code of spatial distribution of PHUs with the status of solar refrigerator.

Table 3 shows the distribution of solar refrigerator status by chiefdoms

Chiefdoms	Functional	Not Functional	Not Available	No Data	Total	% of Unavailable Solar refrigerator
BKM	6	3	2	0	11	18
BUYA ROMENDE	5	0	4	0	9	44
DEBIA	1	3	1	0	5	20
KAFFU BULLOM	2	1	6	0	9	67
KOYA	6	2	5	4	17	29
LOKOMASAMA	7	4	5	1	17	29
MAFORKI	6	3	4	0	13	31
MARAMPA	4	0	2	0	6	33
MASIMERA	4	0	2	3	9	22
SANDA MAGBOLONTOR	2	1	2	0	5	40
TMS	2	3	0	0	5	0

Total	45	20	33	8	106	31
-------	----	----	----	---	-----	----

Moreover, in Kaffu-Bullom chiefdom, out of the 9 health facilities 6 of them (67%) of the PHUs have no solar refrigerator followed by Buya-Romende (44%), Sanda Magbolontor (40%) and Marampa (33%).

In addition, the non-functional solar refrigerator by health facilities shows that, 27% Community health Center (CHC) followed by MCHP and CHP respectively 19% and 14%. As compare to the non-availability, 38% of the Community Health Post reported that, there have no refrigerators at all in the facility followed by MCHP (34%) and CHC (7%).

Table 4. The distribution of solar refrigerator status by health facilities

	Solar Functional Status by Facility Type						
Facility Type	Functional	Non-Functional	Not-available	No Data	Total	% GAP not Functioning	% GAP not available

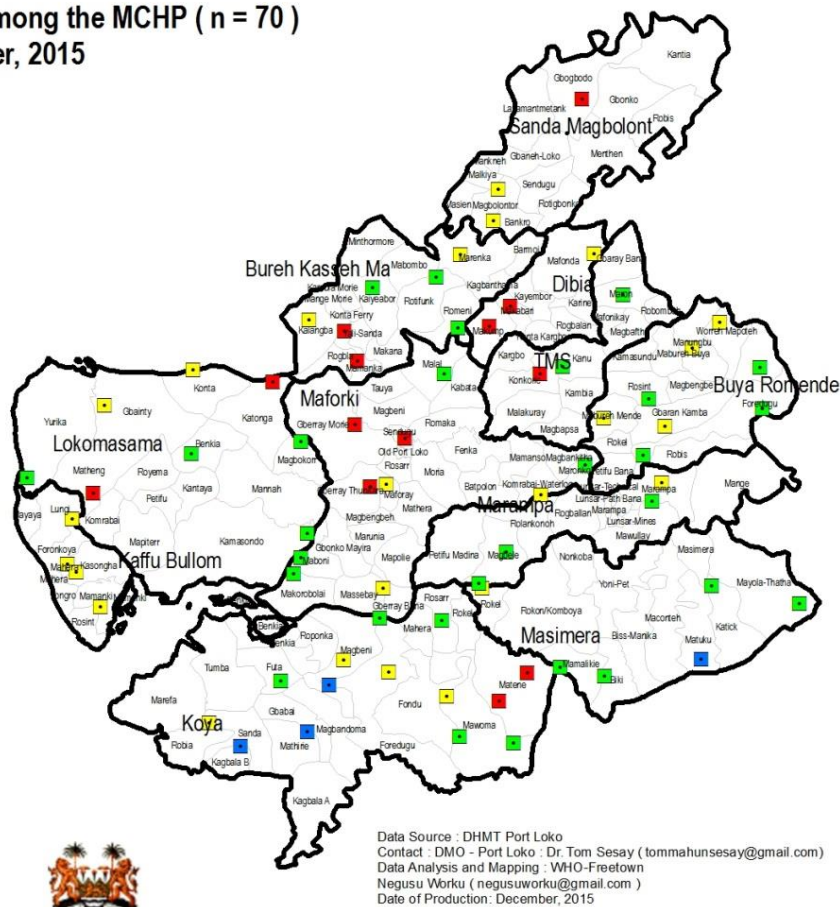

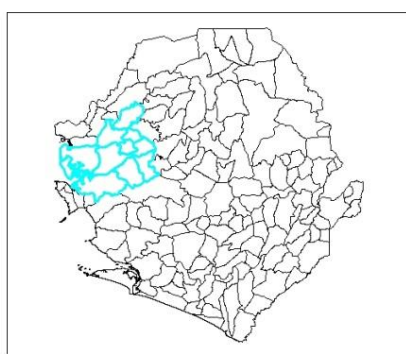

Fig. 5. The Geographic distribution of MCHP (Maternal and Child Health Post) shows that a total of n=70 MCHP were geo-coded to check the service availability. Of which 29(41.4%) have reported that, they have functional solar refrigerator, the rest 13(18.6%) not functional, 24 (34.3% not available and 4(5.7) no data.

Delivery Beds Availability

Form the total n=106 government primary health units (PHUs), only n=32 health facilities have reported with availability of beds in the facility. Of which, n=28 of them have reported at least one delivery bed and four (n=4) health facilities reported that, they have at least two delivery beds.

Table 5: The distribution delivery bed status in Port Loko PHUs, Port Loko, and Sierra Leone as of December, 2015

Delivery Beds Availability	Number	Percent
No Beds	66	62.3
One delivery bed	28	26.4
Two delivery bed	4	3.8
No Data	8	7.5
Total	106	100

Moreover, the availability of delivery beds status by health facility type shows, Community Health Post (CHP) have reported significant number (71.4%) of them are reported no delivery beds followed by MCHP (67%) and CHC (26.6).

Table 6: The distribution of delivery beds status by health facility status, Port Loko, December,2015

PHUs	No Delivery Beds	One Delivery Bed Available	Two Delivery Beds Available	No Data	Total
